Re: New Medical/Retail Project at Northwest Corner of La Canada and Naranja  
Oro Valley, Az. 85737

## PROJECT NARRATIVE Revised

This project is a proposed new ground up Professional Office / Retail center composed of four shell buildings that will be leased to tenants upon construction completion. At this time the corner building (approx.. 2400 SF Drive Thru Restuarant ) is presented in Black and White drawings. The color will approximate the other buildings, but because a final tenant is not procured, the owner reserves the right to resubmit this portion of the project.

The site is 350' x 350' and is 2.81 acres. It is an existing pre-graded site that is essentially level with the streets on either side. There is an existing wash on the north and west sides that will remain in its existing condition and will serve to buffer the site from the residences to the west and north (see aerial view ). See the attached site plan by Grenier Engineering.

Of the three buildings to be built at this time there are two building types. (see plans for SF). The buildings are fully articulated on all four sides and the rooftop mechanical equipment that will be fully screened from 4 sides ( see attached sketch). The buildings will be built of ICFS (Insulated Concrete Forming System ) which is an energy efficient type of construction. The exterior finish materials consist of painted Stucco, Colored Split Face CMU, and metal siding flush panels in prefinished colors. The fascia of certain roof areas are also prefinished metal. The windows will be a 2"x 4" aluminum storefront system.

We believe this project is in compliance with OV ZC/22.9.E.7.b.iii.1. Some, but not all of the reasons are as follows:

C:\Projects\Schwartz La Canada Retail\TOV Arch Submit #3\1-La Cananda - Naranja  
NW Corner Narative.doc

The building is very sustainable in that it uses the ICFS ( Insulated Concrete Forming System ) structural system. In addition the facades of all buildings are articulated and there are trellis/sun screens over many windows to aid in shading and shadowing on the building elevations. The split face CMU veneer at the base of the buildings is in keeping with the neighboring retail center to the south and across the street. The building massing is the same character and scale as the adjacent developments. All colors used are in an earth tone and compliant with the LRV requirements.

We believe this will be a welcome addition to this area of the Town of Oro Valley.

List of exhibits : 24 pages total

1. Narrative
2. Aerial Photo of Existing graded Site and Neighborhood
3. Preliminary Site Plan
4. Bldg. 1 Floor plan
5. Bldg. 2 and 3 Floor Plan
6. Bldg. 1 Color Front / Rear Elevations / Left and Right Elevations – 4 PAGES
7. Bldg. 2 & 3 Color Front / Rear Elevations / Left and Right Elevations – 4 PAGES
8. Color Rendering of 5400 SF Bldgs. ( The color on the renderings has not been revised.
9. Color Birds Eye view of Buildings on Site ( again this color does not reflect the revised colors.
10. Exterior Material Color Board – 2 PAGES
11. Photos of the Existing Undeveloped Site from Various Vantage Points – 6 PAGES

*Oil canning is an inherent part of light gauge cold formed metal products and is not cause for coil, sheet or panel rejection. Protective film must be removed immediately after installation. Colors and sizes can change without notice. Additional sizes may be available, please contact your sales representative. Please contact our office for maintenance and cleaning procedures.*

## Product Description

Ultra-Clad pre-finished metal features Dura Coat Durapon 70% full strength PVDF paint finishes formulated with Cool technology. This high performance product provides the ultimate in resistance against fading and weathering. In addition to our standard colors, custom colors are also available up request.

HYLAR 5000 is a registered trademark of Ausimont USA, Inc.

GALVALUME is registered trademark of BIEC.

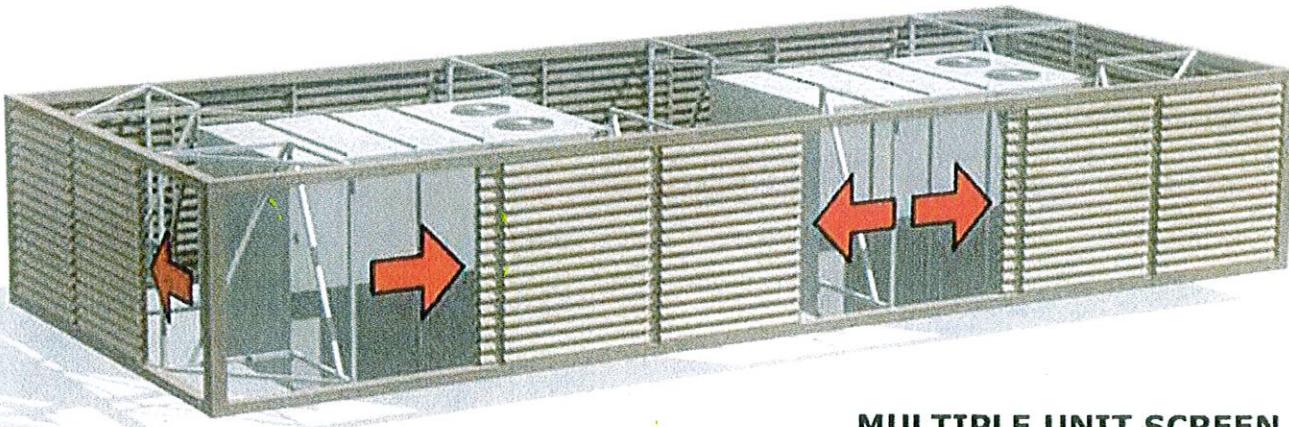

## Color Samples

Colors shown represent the actual colors as accurate as modern printing technology will permit. Colors represented on electronic charts may not match actual material. All colors should be verified using actual metal samples. Mismatch of electronic color representation and actual material shall not be accepted as a cause for rejection. Free metal samples are available upon request.

**MULTIPLE UNIT SCREEN**

#### **ROOF DESIGN**

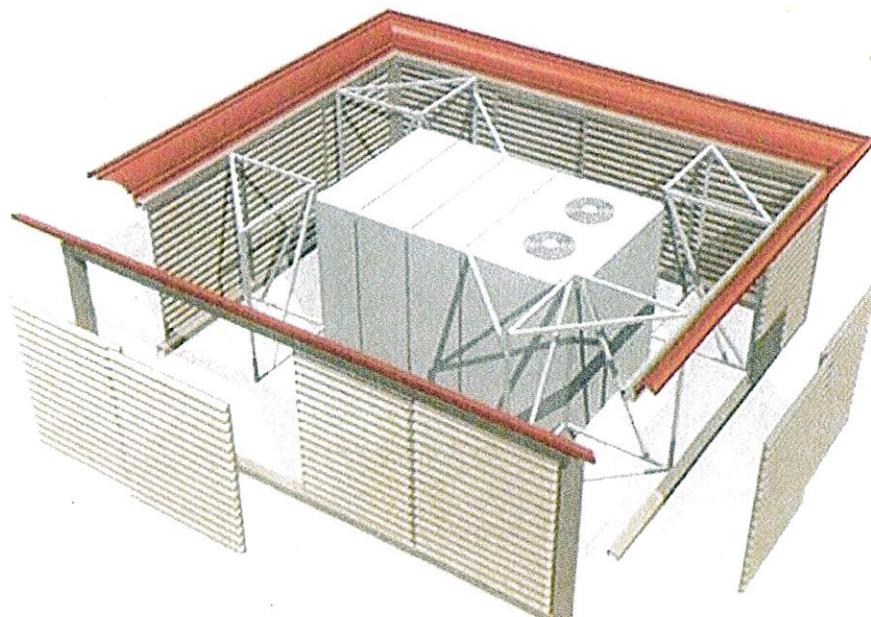

THE DESIGN OF THE ROOF MATERIALS AND ROOF ACCESSORIES ARE AN IMPORTANT ELEMENT IN THE OVERALL ARCHITECTURAL IMPACT OF BUILDING GROUP , . DUE TO THE HEIGHT OF ROAD IN RELATION TO THE HEIGHT OF THE FINISH FLOOR, PASSERSBY WILL BE SUBJECT TO VIEWS OF ROOF ELEMENTS.

EXAMPLES OF THESE TREATMENTS INCLUDE:

1. A NON REFLECTIVE TAN COLORED ROOF TO BLEND WITH THE NATURAL ENVIRONMENT
2. PAINTING OF ROOF ACCESSORIES TO MATCH THE ROOF COLOR AND BLEND WITH THE ROOF BACKGROUND
3. FINISH TREATMENTS OF FACADE ELEMENTS EXPOSED TO VIEW AND OVERLOOKING THIS AREA
4. OPAQUE SCREENING OF MECHANICAL UNITS AND OTHER LARGE PIECES OF EQUIPMENT.

#### **ROOF MECHANICAL UNIT SCREENING**

IN ORDER TO MAINTAIN MINIMAL IMPACT OF MECHANICAL UNITS AND SCREENS, GROUPING OF UNITS WILL BE ENCOURAGED TO THE FULLEST EXTENT POSSIBLE DURING THE DESIGN PLACEMENT OF MECHANICAL AND EQUIPMENT SYSTEMS.
