## 1.0 Project Description

Sprint is proposing a new wireless communication facility located on a Tucson Electric Power (TEP) Utility Pole in town Right of Way near Tangerine Rd and La Canada Dr. The proposed facility will be a 68' Utility Pole. The facility will be constructed and owned by TEP, Sprint will be a tenant on the facility. This facility is designed to use existing verticality in the Town of Oro Valley to reduce the need for new towers in the community.

This facility is being proposed due to a lack of coverage of Sprints network in the area. Sprint has chosen the lease intrusive means to cover the area by using an existing TEP utility pole for their site.

## 2.0 Identification of Interested Stakeholders

Pinnacle Consulting, Inc. has identified the primary stakeholders for this proposed development to be the adjacent land owners in the area, which is primarily composed of residentially zoned lots and Right-

of-Way. Per Town of Oro Valley code section 22.15.F.4.a.i, all landowners within 600' of the proposed development will be notified of the neighborhood meeting.

### 3.0 Proposed Neighborhood Meetings

Pinnacle Consulting, Inc. will be working with the Town of Oro Valley to hold a neighborhood meeting regarding this proposed facility on 11/15/2018 in the Town of Oro Valley Council Chambers from 6-7:30 pm. This meeting will be held for the purpose of informing, as well as answering questions and addressing concerns that attendees may have.
