

PUSCH RIDGE CHRISTIAN ACADEMY

9500 N. ORACLE RD. ORO VALLEY, AZ

NORTHEAST PERSPECTIVE

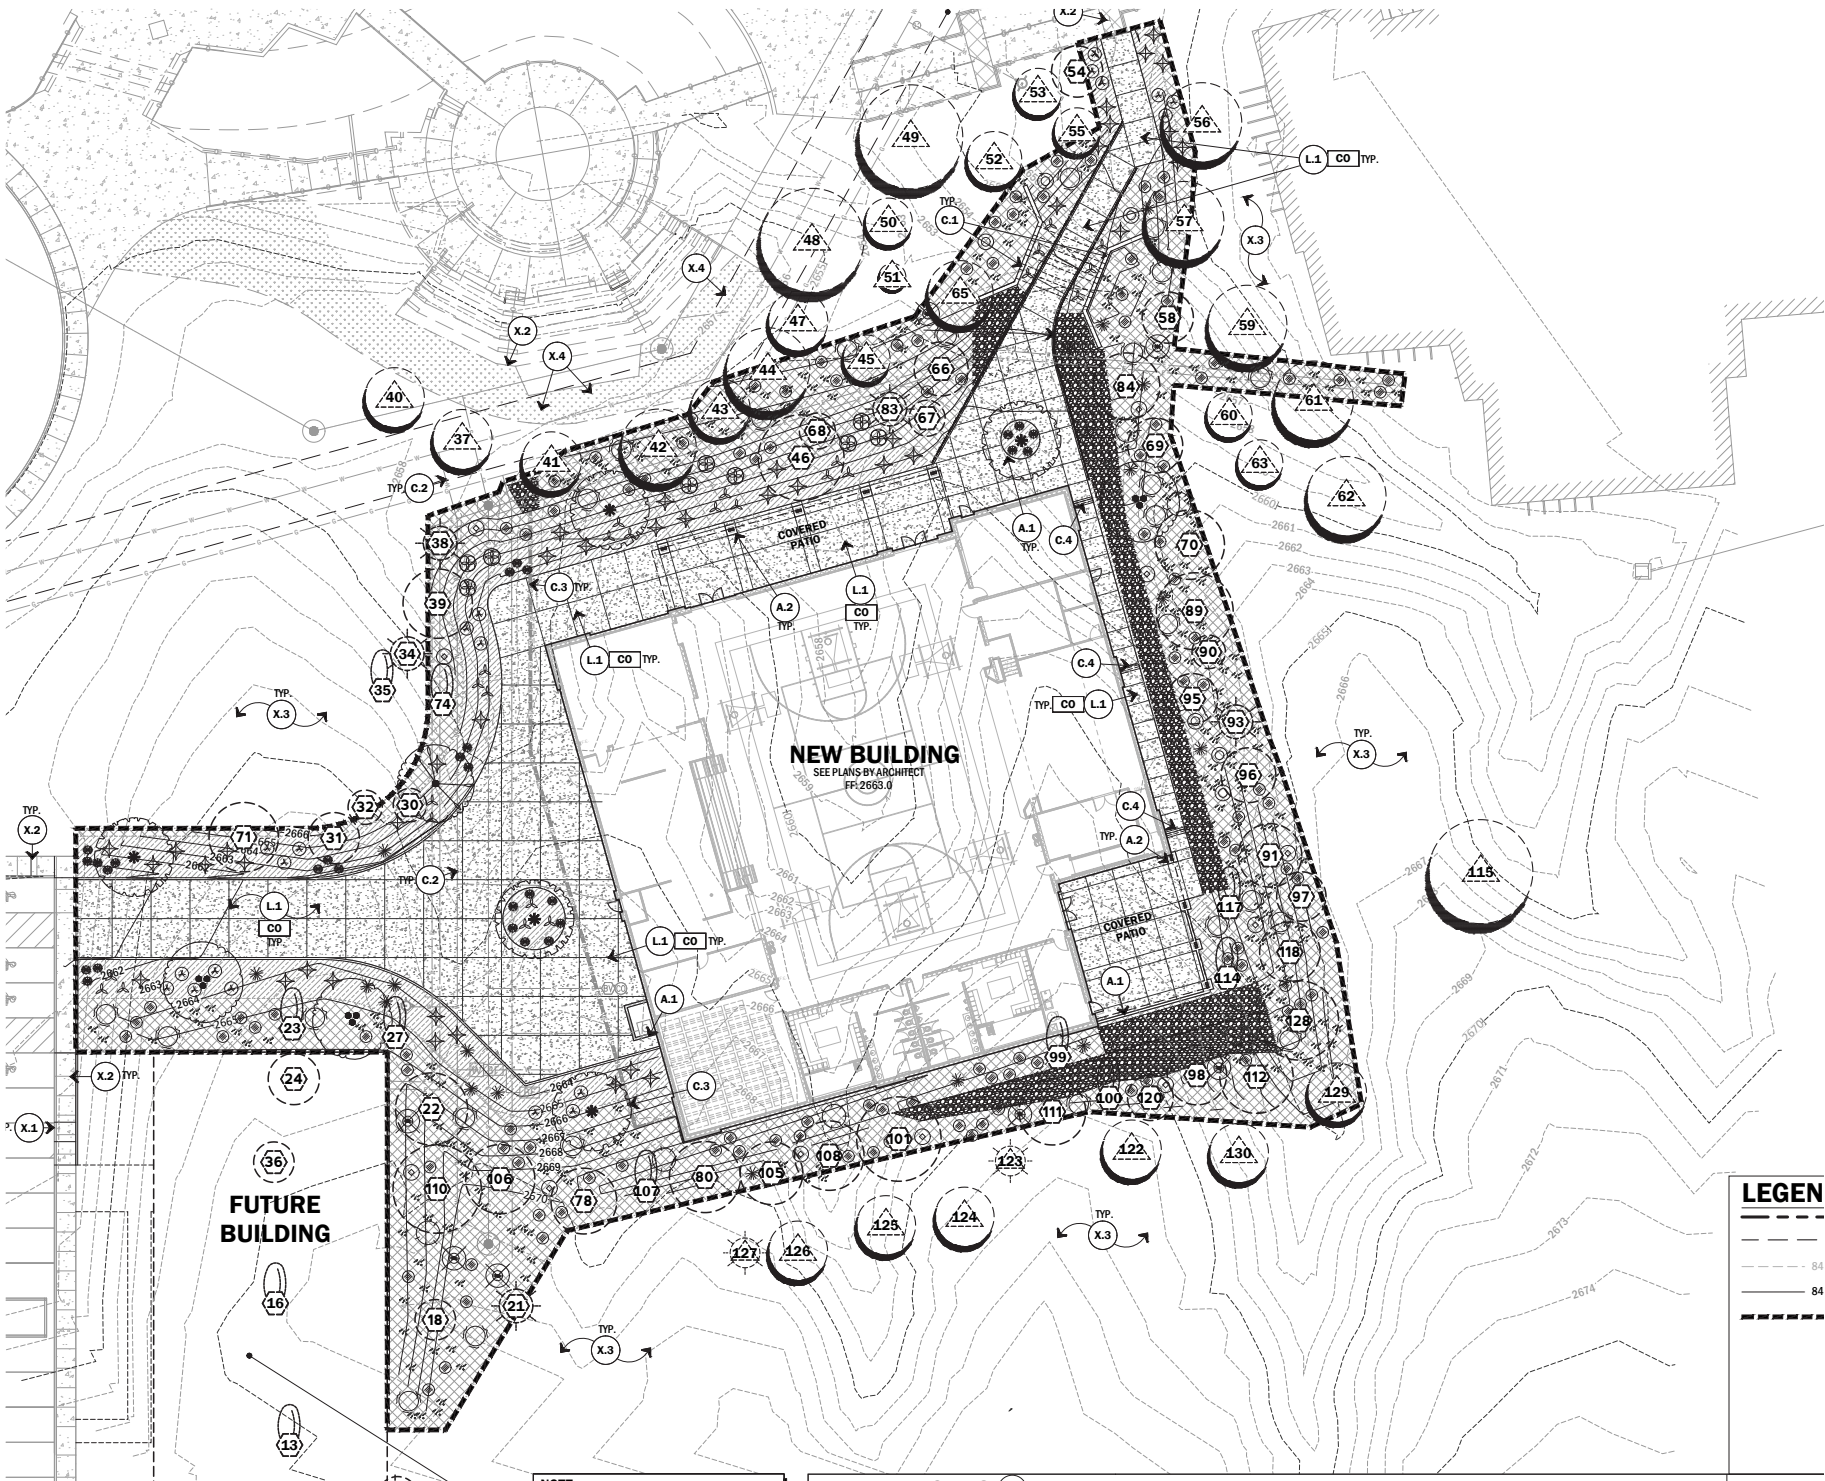

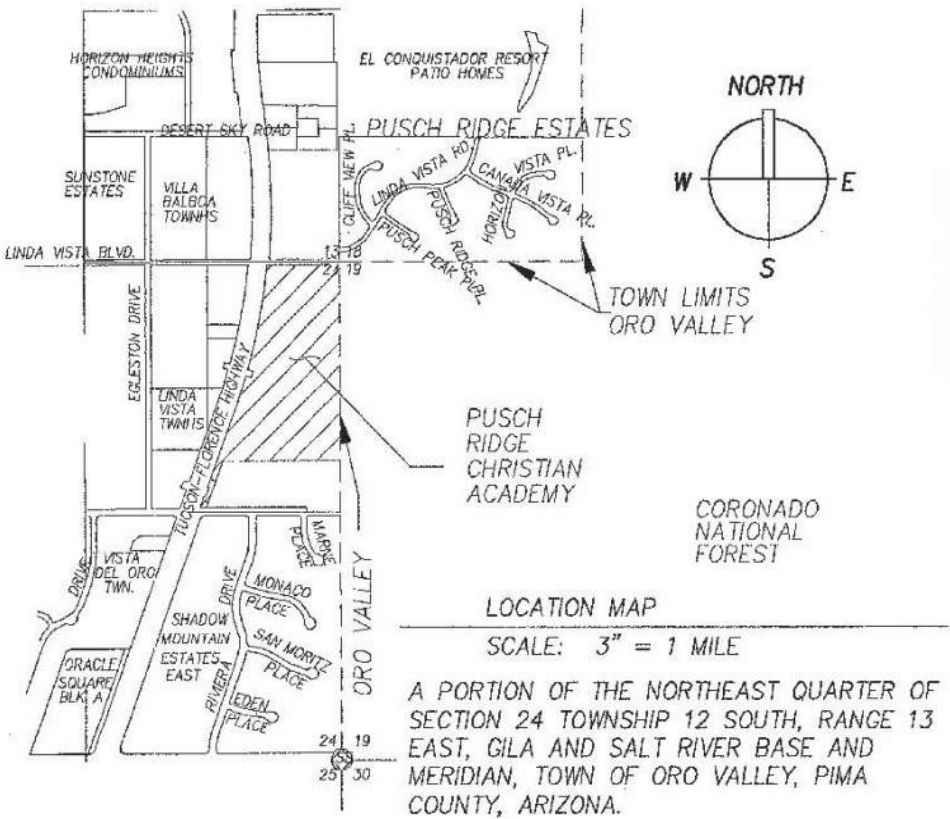

PROJECT DESCRIPTION:

The proposed project is a 17,000 s.f. Multi-Purpose Room for Pusch Ridge Christian Academy on an 48.59-acre parcel on the corner of Oracle Rd and Linda Vista Blvd. The building comprise of a full kitchen, basketball court / cafeteria, locker rooms, restroom, offices and a performance platform. The MPR is developed for up to 740 occupants from the existing school.

ARCHITECTURAL DESIGN STRATEGY:

The building takes cues from its surrounding landscape to reflect the colors of the desert. The use of colored split face block and stacked blocks and on each façade allows us to have 3 distinct materials. Mases are articulated and gradually broken up with the use of metal panels. The main entrance is marked by the intersection of the protruding tower and the shade canopy. Awnings that provide protection for the doors and windows are similar to ones found on campus. The large shade structure mimics the existing in color and scale.
